# *This could be you!*

USA Today  
**Best new theme park  
attraction of 2017**

IAAPA  
**Brass Ring Award  
2017**

Steve Beckley, co-owner, Glenwood Caverns Adventure Park  
**They absolutely came through for us!**

*Haunted Mine Drop* at Glenwood Caverns Adventure Park is the world's first underground drop ride!

Creative Visions was tasked with developing and fabricating the theming. This included visual effects, props, sets, multimedia elements, special effects and an engaging story that sets up an amazing drop experience.

Paul Ruben, Park World Magazine  
**A unique and very creative ride.  
Beautifully themed. Thrilling.  
They've got a winner here!**

CoasterHub.com

**Far exceeded my expectations and quickly  
became my new favorite... even taking  
the edge over Disney's Tower of Terror!**

Stan Checketts, creator of the drop ride  
**They did a beautiful job with  
this building & the theming.**

CoasterRadio.com

**A world class attraction!  
It was awesome.**

CreativeVisionsOnline.com

This quickly became a popular gathering point at Riotfest...and so many selfies!

It starts with a great concept and a compelling story.

From there we develop and fabricate the elements, ensuring they serve the story and advance the narrative, coming together to create...the experience!

We have a unique advantage because of our in-house capabilities- animatronics, props, sets, effects, motion simulators, and multi-media elements.

Three stories tall and over sixty-five feet wide, this fiberglass creation is the world's largest indoor dragon!

Anubis...keeping watch in the escape room.

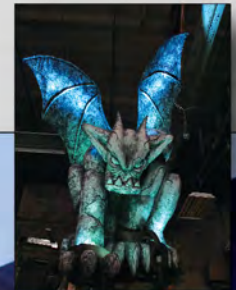

This boiler scene is part of the elaborate queue for Jaws Encounter at Sun Asia Ocean World in China.

## Theming the world...Because fun is global

The Moonrise Hotel became a local landmark the day it opened. The spaced-themed boutique hotel, with a giant rotating moon is consistently ranked among the nations best.

Each fall, these iconic giant gargoyles rise up and stand guard at the entrance to Eastern State Penitentiary for their Halloween event...Terror Behind the Walls.

When Caterpillar decided to promote it's clean manufacturing initiative, they called on us to help bring this multi-media display to life.

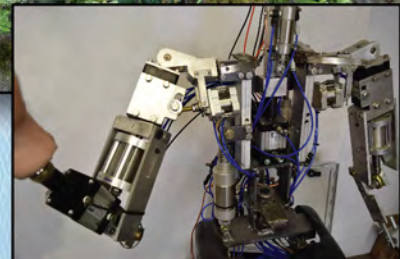

Standing 28 feet tall, these giant stone sentinels greeted the FantasyCon attendees as they entered the convention floor.

# Animatronic

Animatronic Characters are an invaluable part of modern theming...as stand-alone elements or as part of an attraction.

# Characters

Animal

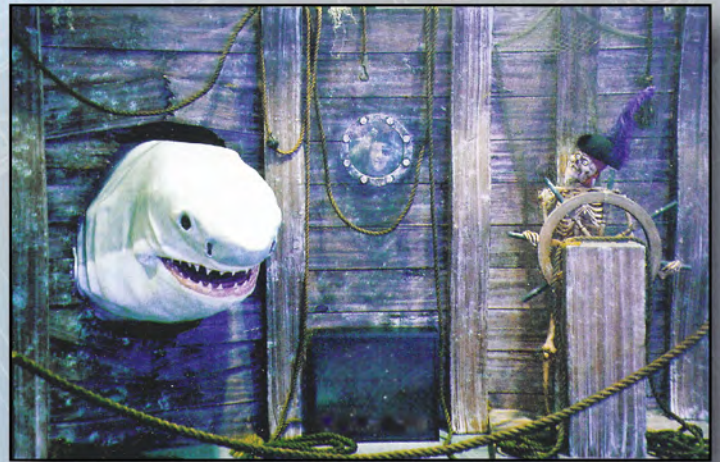

Bring nature's most majestic, dangerous and rare creatures to life. Exhibit endangered animals without worry! Indoor, outdoor or under water.

Fantasy

Need a huge pumpkin monster? No problem. How about some dancing hippos? Sure! What's that...a giant talking pumpkin? You want it with or without the talking corn?

Human

Amazing animatronics come to life... telling stories and entertaining your guests. Our human animatronic characters are designed for ease-of-use and versatility!

# MOTION SIMULATORS

Truly immersive theming takes advantage of all the senses, including your sense of balance!

Our rugged motion simulator systems are perfect for 4D/VR shows, themed rides, or as attraction elements.

If the floor needs to move...we have a solution.

## Wild West Adventure-

Entice your guests the moment they lay their eyes on the ride, with a motion simulator that is themed inside and out. Fun for the whole family as you race to escape the bandits!

## The Crab Pot-

This fun seafood eatery creates the experience of dining on a crab boat!

Journey through the Alaska waters, the boat gently rocking, as the panoramic view reveals the beauty while the animatronic captain keeps their guests engaged!

## The Travelers-

When Sun Asia Ocean World in DaLian expanded their aquarium, they decided to create a unique entry system, three motion simulator diving capsules to bring the guests to the ocean floor 200 feet below the surface!
