Custom sculpted pumpkin art  
For indoor or outdoor use  
Synthetic pumpkins for long-life

Perfect for zoos, theme parks and  
family-friendly halloween displays.

Includes LED lighting, power supply and waterproof box for power supply.

## Monster Gas

### Everybody farts. Even monsters!

Ever wonder what a Werewolf fart sounds like? Or Dracula's? Touch the monster and hear them break wind.

There are seven characters with seven very unique air biscuits. Set off one steamer at a time or get your friends to help and make them toot together!

Self-contained  
Includes sound system  
37" wide x 27" tall

## MonsterGasm

No. This is not a joke.  
Have we crossed a line here? Quite possibly.

MonsterGasm is exactly what the name implies.  
Touch the monster's face and hear their...happy sounds??

Trigger them one at a time or get your friends to help  
and touch them all at once!

## Glowing Pumpkin Sculptures

This could be your logo!

## Squishy Bridge

We purchased two of these for one of our haunts. Our patrons absolutely LOVE it.

It was likely the easiest effect installation we have ever done. So well received and easily installed that we ordered more for our other attraction.

**Christopher Gilgour- Hundred Acres Manor**

The Squishy Bridge is just what it sounds like... a unique walking sensation for your attraction!

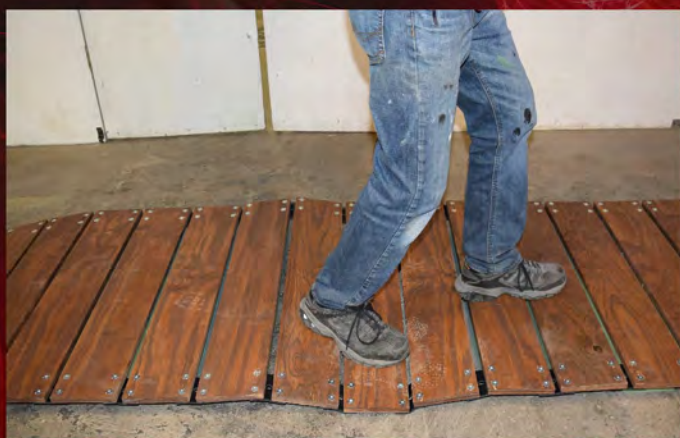

36 inches wide and any length you need!

Expand in the future by adding more planks.

ADA compliant and wheel chair friendly.

We simulated 105,000 steps, with only 4% loss of sqishyness!

Self-ramping...so it's very easy to install.

Uses...

Spinning tunnels

Laser swamp rooms

Claustrophobia hallways

Suspension bridge effects

...and more!

## Squishy Floor

Like the Squishy Bridge...  
but everywhere!

This was the perfect addition to our Laser Swamp.

The sensation of an unstable floor that you can't see, really heightens the anticipation and allows the actors to get awesome scares! Everybody loves it!

**Ryan Burke- Massacre Haunted House**

A Squishy walking sensation that can be customized to your floor space.

Create any size or shape floor with the modular squishy squares!

Self-ramping & designed to take a beating.

Top with carpet (not included) to complete the effect.

The Squishy Floor is a combination of short and tall squares that measure 12" across. The short squares ramp to the ground and the tall squares are used everywhere else.

## Ghost Screen

An image floating in midair!

Lost River of the Pharaohs- Water World, CO

Imagine walking through a projected image in the middle of a room... or floating through it on a water ride.

72" wide projection screen.  
Screen height up to 72".

Comes ready to use with screen generator, ducting, fog machine, video projector, fire video, automation controls and a case of fog fluid to get you started.

Does not require compressed air.

Standing 14' tall and 17' wide, this beast of an animatronic has nine motions, plus Sho-Blast effects and DMX controlled lighting with pulsating heart beat.

Beefy steel frame with rugged fiberglass shells. Use indoors or outside.

## Pumpkin Monster

### Includes:

- Pumpkin Monster automation controls
- powerful sound system
- motion sensor
- internal lighting
- Sho-Blast fog system in both hands
- pneumatic controls and connections

# Multi-Motion Pro

Create a Theme Park quality  
Elevator or Moving Floor effect!

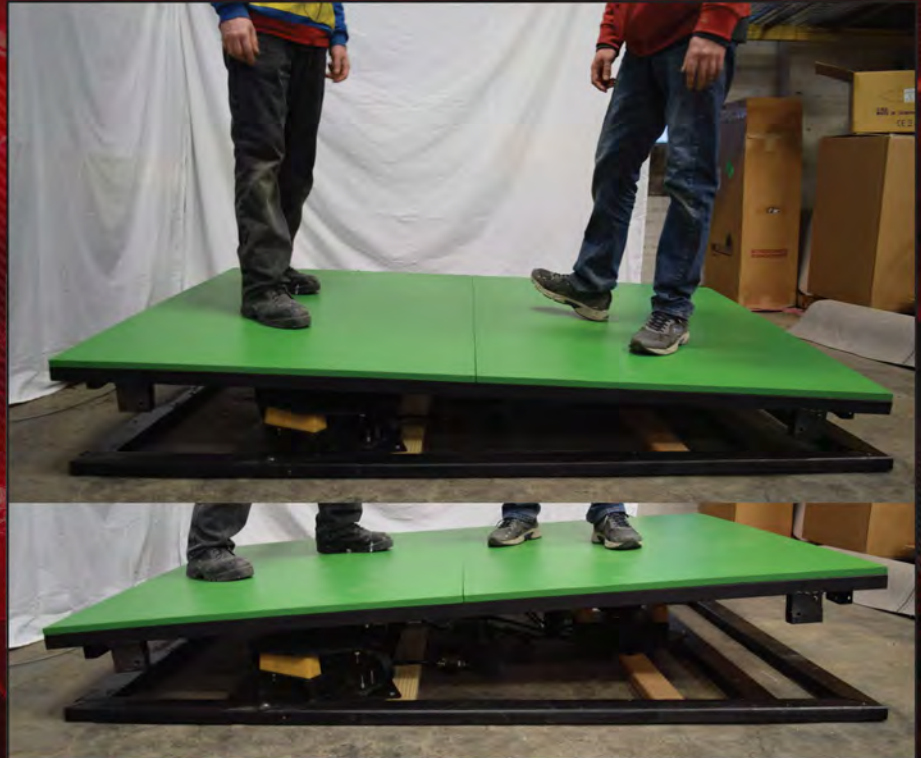

Create a wide variety of moving platforms. Make an elevator one year and later you can turn it into a moving floor for your escape room.

Platform size can be up to 8' x 8' and safely move thousands of pounds!

Set up for 2 Degrees of Freedom (moves up/down & side to side) or 3 DOF (full range of motion- tilts any direction)

Comes with air distribution system, set of four pneumatic floor movers, automation, motion sensor, emergency stop button, and instructions.

Options include a Dual Speed Drop. This allows you to have a variety of dropping actions...from slow to fast. Optional welded platforms available as well.

Uses...  
Escape Rooms  
Elevator Effect  
Earthquake Scene  
Motion Simulator Ride  
Moving Sidewalk Effect  
Nautical Scenes  
Moving Rooms

requires compressed air and 115-240 VAC
